

Device:

Sitemate II monitoring host, with UPS monitoring and environment monitoring, is specially designed and developed for data center. It adopts popular 19 inches rack-mounted design style with 220V-240V communication power supply, which is more suitable for the design demands of modern machine room. What is more, it supports 16 channels switch quantity detection, 8 channels analog quantity input and 6 channels delay output control, which can satisfy the monitoring demand of small and medium-sized machine room, it is the best choice for building a modern unattended data center.
